Revolutionizing
Auto-Contouring

Next-Generation Contouring

Segasist auto-contouring tools make diagnosis and treatment planning more efficient.

Segasist revolutionizes auto-contouring by continually capturing editing preferences and applying this knowledge to deliver high-quality results for new images.

The **Segasist Engine** is an unrivalled segmentation engine that can be integrated within any software system.

Segasist tools increase their segmentation accuracy via interaction with clinical experts.

Segasist learns to contour like an expert would.

Segasist Engine makes accurate cross-modality segmentation fast and easy for many lesions/organs.

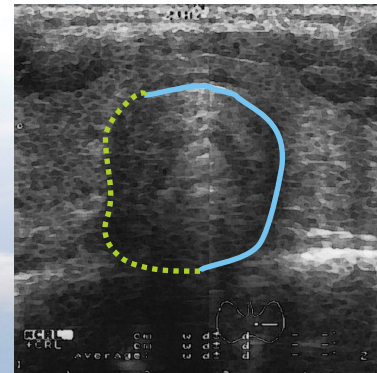

Segasist can auto-contour lesions/organs in any modality (CT, MR, Ultrasound etc.)

Current Products

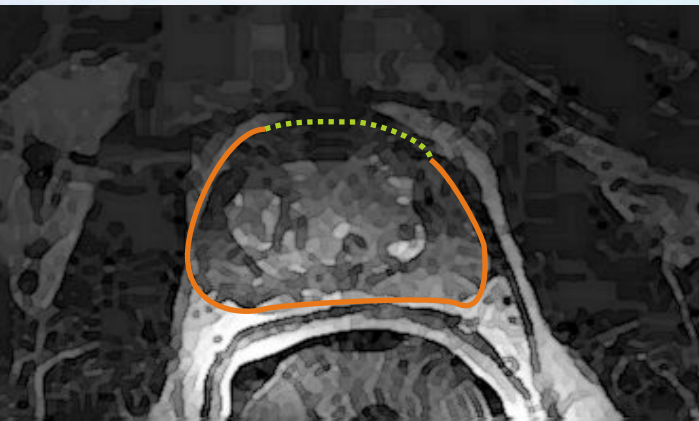

- Prostate CT
- Prostate MRI
- Prostate Ultrasound
- Breast MRI

Under Development

- Lung CT
- Liver CT
- Thyroid Ultrasound
- Cardiac MRI

Segasist is a highly efficient and helpful tool for radiation treatment planning.
